High Rise Height Adjustable Standing Desk Workstation

DCX760

SUPERIOR TO VARIDESK PRO PLUS 36

The DCX760 High Rise Height Adjustable Standing Desk Workstation is a simple solution to a common workplace problem: too much sitting. Studies show that sitting for prolonged periods of time is detrimental to your health. The DCX760 transforms any sit down desk into a sitting OR standing desk. Large 36" wide X 23" deep desk surface is accompanied by a 35" wide X 14" deep removeable keyboard tray. The desk height raises to 21" and the keyboard tray raises to 16.5", providing an ergonomic working position for users of varied heights. Gas spring system allows for smooth and stable height adjustment. The DCX760 sits on top of your current desk or table and does not require clamping or attachment of any kind. Sleek wood construction and a durable, scratch-resistant laminate coating will provide years of use with a modern style. Simply go from sitting to standing with an easy squeeze of the side levers.

How does the DCX760 beat Varidesk Pro Plus 36?

- Adjusts straight up and down. Varidesk moves up and out over 13 inches, forcing user to move away from desk.
- Easily fits on standard 24" deep cubicle desk (22.6" frame depth). Varidesk's front frame extends over the desk edge.
- Mouse location is ergonomically comfortable. It can be placed parallel to keyboard. With Varidesk, keyboard space is limited so the mouse is closer to the user causing discomfort.
- Raises high enough for taller users. 21" for desk surface and 16.5" for keyboard tray, which is 2.25" taller than Varidesk.
- Large upper work surface provides 740 square inches of space, which is 50% more than Varidesk.
- Includes two slots on keyboard tray to hold mobile devices or writing utensils. Varidesk does not have this feature.
- Includes grommet hole for monitor mount. Varidesk does not - must use proprietary clamp style monitor arm that will cost more. DCX760 is compatible with other brands of monitor arms.
- Compact footprint - 22.6" depth from wall to front of frame. Varidesk is much larger at a depth of 25.75"

**Optional monitor mount with single and dual monitor components available*
